

Enter Daily Running Hours

Open Onboard>Logs>Engineering tab. This task will be at the top of the list.

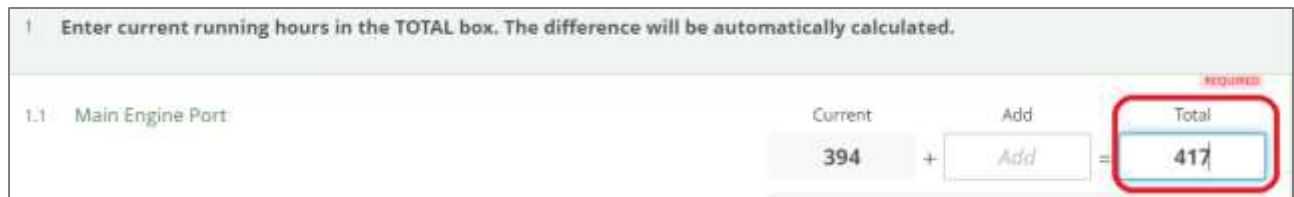

Open the task and enter your name as Inspector and the current date.

When you select the inspection date, the estimated current running hours will automatically be filled in the “Current” box.

You will enter the ACTUAL CURRENT RUNNING HRS in the TOTAL BOX.

The system will calculate the difference for you and fill in the Add hrs box.

There will be occasions when you may have missed a few days of entry. Just enter the current running hours in the total box and the current date for inspection date.
