

TDI Training Packets

Instructor Cheat Sheet

Core Safety Training was developed as TDI's training on issues most relevant to the safety of our workers at sea. It started as a 1-2 day in person training class. In **2017** it was turned into self study packets. **The packet quizzes are posted to the Crewing Module as proof of training** and the laborious and time consuming creation of additional **certificates of completion** was **eliminated**.

What's Changed...

- **All but 3** of the **Core Safety Training** classes are **now computer based** training on our MTS SeaDrive system. **Lifting Gear, Permits and Management of Change** must still be done as packets.
- Answers to quiz questions have been visually tagged in the PowerPoints with eye-ball icons. 
- Instructions have been clarified on each quiz and sign in sheet.
- Bridge Crew needs a paper copy of the quizzes for their records— Binder #11

What Has NOT Changed...

- A scanned pdf of the quizzes must be emailed to HSE@tdi-bi.com OR a paper copy of each quiz must be returned to Shannon at the office.
- A separate sign in sheet is needed for each class.
- **Return the originals to the students—IT IS THEIR PROOF OF TRAINING!!**

Maritime Training System (MTS) SeaDrive

Is a cloud based training system with an independent unit on board each TDI vessel and has been TDI's training system since **October 2018**. It offers over 150 maritime specific courses and **can be used to train classes** as well as individuals. The training can be accessed anywhere internet is available, but internet is NOT required to train on the vessels.
