

Bridge Memorandum #9: SMM 12.5 Released

The new revision of the SMM, version 12.5 has been uploaded to all vessels and the Internet. If you open the browsers on your ship computers to the Ship Web Pages, you see the home page background color is now green and the revision number updated on the page.

All twenty-eight notices of change since the last revision have been added to the ship web pages and included in the new 12.5 Safety Management Manual.

The new forms (Quarterly Inspections, Management of Change, Winch Inspection, Crane Inspection and Crane Maintenance) have been included on the SMM Forms Only page.

The Party Chief page now includes a guide to recordability of injury and illnesses, an OSHA guide to prescription levels of over the counter medication and a new Pre-Start meeting form that includes a checklist of items and policies to be covered.

You will notice there is a new Videos and Powerpoints page, but most of the videos are too large to transmit and must be hand carried to the vessels. The links will not work until those are installed.

Deck Chief page now includes the 2012 Pendant Color Chart, the Employee Manual and the Fleet Memos page have been updated and the New Employees page now includes the current 2012 forms.

If you notice any problems or other broken links, please let me know. Thank you!

Shannon
